1 Scope

This document includes the price list of WiMAP-4G. It replaces all previous price lists.

2 Prices and license terms

2.1 License terms

2.1.1 Editions: Community and Professional

The Professional Edition offers the complete feature set, apart from services that need to be licensed against third parties.

The Community Edition has additional project orientated limitations. In one project the number of possible sites and points is restricted. Also the resolution for displaying the calculation results is limited and parts of the import/export functions are inaccessible. We reserve us the right to restrict new and more functionalities in future releases of WiMAP-4G Community Edition.

2.1.2 License and Support

The support agreement includes free e-mail support and free updates for WiMAP-4G during the license period. Telephone support can be booked additionally to a support agreement and will be charged on a 15 min basis. During the license period updates for WiMAP-4G Professional Edition will be free of charge, for the Community Edition this can, but explicitly does not have to apply.

Trainings and/or on-site support are not included in any license, but are available and can be purchased on request.

2.1.3 Warranty

Correctness and completeness of the data of third parties used in this software is not warranted. The SRTM elevation data, building data, satellite images or OpenStreetMap™ materials are belonging to this third party data. It is also outside the responsibility of this license to warrant the access to the data of the according providers.

Correctness and completeness of the building up results is not part of any warranty either.

Besides these special conditions the General Terms of brown-iposs apply.

2.2 Prices

2.2.1 WiMAP-4G Software

The WiMAP-4G Community Edition can be downloaded and used free-of-charge. Additional service like support agreements can be purchased in combination with the purchase of WiMAP-4G Professional Edition according to our price list.

Software Product	License
WiMAP-4G Community Edition	0.00 €
WiMAP-4G Professional Edition	3,000.00 €

2.2.2 Additional Services

Brown-iposs offers additional services in the form of maintenance, support agreements, trainings and on-site support.

Additional Services	Per User
1 Year Support Agreement	750.00 €
15 Minutes Phone Support	20.00 €
Training WiMAP-4G	Price on request
On-site Support	Price on request

2.2.3 CORLA (3D Prediction)

Like the Professional Edition of WiMAP-4G also the ray-tracer CORLA needs a dedicated license. Once licensed it can be used with any project in WiMAP-4G. However using building data is strongly recommended, and is not itself part of this license. WiMAP-4G is providing an in-built option to download building data from OpenStreetMap™.

Number of Projects (ordering within one year of initial maintenance is mandatory)	License Corla-3D-Ray-Tracing Engine (excl. WiMAP-4G Professional Edition)
CORLA (per Professional Edition)	2,800.00 €
Maintenance (1 year Support Agreement)	700.00 €

The usage of CORLA can be licensed under the conditions of the above price list. This is applicable only when purchasing the Professional Edition of WiMAP-4G.

2.2.4 All prices are net prices (exclusive VAT)

All prices and charges in the price list are net prices. Value-added tax (VAT) will be added to the price according to national regulations and laws (at present 19 %).

3 Terms of Payment

License fees are due when ordered. The license will be provisioned immediately after confirmed payment receipt. Payments for other services are due immediately to provisioning. Invoices must be settled within 14 days. Support agreements start with the day of confirmed payment receipt.

4 Supply Conditions

4.1 Terms & Conditions

As long as no other conditions are mentioned in this document, the General Terms of the brown-iposs GmbH are forming the basis of this offer.

4.2 Contact Person
